

## INFOMAPPER ([www.infomapper.com](http://www.infomapper.com))

**Infomapper is an online cross-curricular Teaching and Learning tool that allows you to access, create, display and share information in exciting new ways. Infomapper provides you with maps and aerial photographs as ready made layers and you can add your own information layers. Teachers and pupils can easily add their own resources, which can then be shared with others.**

### What does Infomapper provide?

- UK Ordnance Survey maps, UK Aerial photography and World Maps.
- Tools to create resources and web pages and then link them to the maps. Tools to share these learning resources electronically.
- Over 300 layers of information.

### How can I use it?

- Create Field Trip / School Trip resources.
- Create resources about your School Environment.
- Create Local History resources, working with a local Museum.
- Do a Joint Project with other schools.
- Create Citizenship information.
- Create a bank of Language teaching resources.
- Present your resources in class.
- Publish resources to the rest of the world.

### How do I register?

- Choose a member of staff to register the school.
- Visit <http://www.infomapper.com> and check the information available underneath the Support tag, including the pre registration checklist.
- Click on the Home tag and choose the How to register button.

### How much does it cost?

£80 pa (Primary Schools)  
£240 pa (Secondary Schools)  
This is a 60% discount!

### What do Teachers say?

'The children were excited by the uses of the program in particular the zooming in and out of the maps and the overlays of aerial photographs. They were particularly fascinated with the ability to go anywhere in the world and see aerial view and maps interacting.'

'InfoMapper does have a 'wow' factor. Everyone who has used it, both staff and student has been excited and impressed by the quantity and detail of the available digital data, fascinated by the way layers can be superimposed, and intrigued by their ability to interact with the data using InfoMapper.'

### Latest News

- Infomapper is now available for Home Access.
- New Infomapper tools are being created to improve functionality.
- Infomapper is free to your international link schools if you are registered.
